SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 09 (/PROJECTS/PISCINE-JAVA-DAY-09)

You should evaluate 1 student in this team

Git repository

`git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-fdb6f7b`

Introduction

The methodology of School 21 makes sense only if peer-to-peer assessments are done seriously. This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.

- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.

- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.

- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.

- Meticulously check that nothing malicious has been used to mislead you and have you assess something except

the content of the official repository.

- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating.

In these cases, the assessment is completed and the final grade is 0 (or in a case of cheating is -42).

However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise even if the following exercises are correct.

 subject.pdf (<https://cdn.intra.42.fr/pdf/pdf/26256/en.subject.pdf>)

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

 Yes

 No

Piscine Java | MODULE 09

Exercise 00 – Registration

- Does server application architecture match the one described in the task?
- Is it true that all components are bins of the context?
- Is repository implemented via JdbcTemplate?
- Is PasswordEncoder used for password hashing?
- Is encrypted password successfully saved to DB upon registration?

 Yes

 No

Exercise 01 – Messaging

- Does application functionality enable to complete the life cycle specified in the task?
- Does each running client receive messages sent by other clients?
- Are all messages saved in database considering the required information?
- Is it possible to exit the application by entering an Exit message?

☒ Yes

☐ No

Exercise 02 – Rooms

- When creating a room, can a user specify its name?
- Does a user receive last 30 messages when re-entering the application?
- Does a message sent inside a room reach other users in this room?
- Is JSON format used to exchange messages?

☒ Yes

☐ No

Ratings

Don't forget to check the flag corresponding to the defense

☒ Ok

☐ ★ Outstanding project

☐ Empty work

☐ No author file

☐ Invalid compilation

☐ Norme

☐ Cheat

☐ Crash

☐ Leaks

☐ Forbidden function
