SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 08 (/PROJECTS/PISCINE-JAVA-DAY-08)

You should evaluate 1 student in this team

★

Git repository

`git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-c78fa` 📋

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all
communications during this assessment. The bond of trust
between community 21 and you depends on it.

- Highlight possible malfunctions of the work done by the person
and take the time to discuss and debate it.

- Keep in mind that sometimes there can be differences
in interpretation of the tasks and the scope of features.
Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT
repository of the student or group.

- Doublecheck that the GIT repository is the one
corresponding to the student
or the group as long as to the project.

- Meticulously check that nothing malicious has been used
to mislead you and have you assess something except
the content of the official repository.

- If you have not finished the project yet, it is compulsory
to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty
or non-functional solution as long as a case of cheating.
In these cases, the assessment is completed
and the final grade is 0 (or in a case of cheating is -42).
However, except for a case of cheating, you are encouraged to continue
reviewing the project to identify the problems that caused the situation
in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise
even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work
at any time during the assessment.
- The general rules and any rules specific to the day are
respected throughout the assessment.

✅ Yes   ✕ No

Piscine Java | MODULE 08

Exercise 00 – Spring Context

- Does solution contain all specified classes?
- Do the structure and cohesion in classes comply with the specified UML?
- Does context.xml contain bins for all components?
- Is prefix defined as an argument of a bin in context.xml?
- Does program work properly when a standard class
call is used instead of context.xml? (see example in the task).

✅ Yes   ✕ No

Exercise 01 – JdbcTemplate

- Does project architecture comply with architecture described in the task?
- Is there db.properties file containing the specified connection parameters?
- Are all UsersRepository classes/methods
specified in the task implemented correctly?

- Are two DataSource bins described in context.xml?
- Is there a findAll check in Main for both repositories?
Does it work correctly?

✅ Yes   ✕ No

Exercise 02 – AnnotationConfig

- Does project structure comply with the task?
- Is context.hml file missing?
- Are annotation use requirements met for context configuration?
- Does signUp method return a random password and save information in database each time?
- Is test that uses an in-memory database available and working correctly?

✅ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok   ★ Outstanding project

📄 Empty work   💬 No author file   💀 Invalid compilation   📓 Norme   🖳 Cheat

☤ Crash   💧 Leaks   🚫 Forbidden function
