SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 06 (/PROJECTS/PISCINE-JAVA-DAY-06)

You should evaluate 1 student in this team

★

Git repository

`git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-8357be8`   📋

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all
communications during this assessment. The bond of trust
between community 21 and you depends on it.

- Highlight possible malfunctions of the work done by the person
and take the time to discuss and debate it.

- Keep in mind that sometimes there can be differences
in interpretation of the tasks and the scope of features.
Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT
repository of the student or group.

- Doublecheck that the GIT repository is the one
corresponding to the student
or the group as long as to the project.

- Meticulously check that nothing malicious has been used
to mislead you and have you assess something except

the content of the official repository.

- If you have not finished the project yet, it is compulsory
to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty
or non-functional solution as long as a case of cheating.
In these cases, the assessment is completed
and the final grade is 0 (or in a case of cheating is -42).
However, except for a case of cheating, you are encouraged to continue
reviewing the project to identify the problems that caused the situation
in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise
even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work
at any time during the assessment.
- The general rules and any rules specific to the day are
respected throughout the assessment.

       ☑ Yes   ✕ No

Piscine Java | MODULE 06

Exercise 00 – First Test

- Does project structure comply with the task?
- Are isPrime and digitsSum methods implemented correctly?
- Are there exactly four test methods implemented?
- Are annotations specified in the task used?
- Is csv file prepared?
- Are there at least 10 numbers in csv file?

- Is 100% text coverage provided?
- Do all test work correctly?
- Is it possible to run tests using "mvn clean compile test" command?

        ☑ Yes   ✕ No

Exercise 01 – EmbeddedDatabase

- Does project structure comply with the task?
- Are spring-jdbc and hsqldb dependencies used?
- Are schema.sql and data.sql files prepared?
- Does testConnection method check connection and work properly?
- Is it possible to run tests using "mvn clean compile test" command?

        ☑ Yes   ✕ No

Exercise 02 – Test for JDBC Repository

- Does project structure comply with the task?
- Is in-memory database used?
- Are test methods isolated from one another?
- Is findById test implemented and working properly?
- Is update test implemented and working properly?
- Is save test implemented and working properly?
- Is delete test implemented and working properly?
- Is findAll test implemented and working properly?
- Is it possible to run tests using "mvn clean compile test" command?

        ☑ Yes   ✕ No

Exercise 03 – Test for Service

- Does project structure comply with the task?
- Is UsersRepository mock object used?
- Is authenticate method implemented as per logic specified in the task?
- Is stubbing of findById and update methods used?
- Are test methods implemented for all cases and working correctly?
- Is it possible to run tests using "mvn clean compile test" command?

        ☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

        ✔ Ok   ★ Outstanding project

📓 Empty work   💬 No author file   💀 Invalid compilation   🎵 Norme   🗐 Cheat   ♟ Crash

💧 Leaks   ⊘ Forbidden function
